

## Diagnostic Tools

### HIT-6™: The Headache Impact Test

This test helps patients assess and better communicate the effects of headache on their lives. Responses can help track a patient's headache history, and contribute to a more successful treatment program.

### ID Migraine™

This easy to use, three-item migraine screener was found to be a valid and reliable screening instrument for migraine headaches.

### SNOOP

Secondary causes of headache are of great concern to physicians. The mnemonic SNOOP was developed as a reminder of the "red flags" that may point to the potential of a more serious, secondary headache.
